MADE IN USA

Hooker Electric remains a leader among fishing enthusiasts with the integrated detachable reel drive. The quick release motor allows an angler to get sporty with the fish when hooked, to fight the fish by hand-crank. Then in a few seconds you can quickly reattach the drive to check baits. With the fastest retrieval rate at 500' per minute, you save a lot of time and catch more fish! Our drives come stock with a powerful 2HP brushless 12/24VDC motor and full variable speed control.
